Epos

EPOS

The origins of the EPOS Company date back to 1925. In that year, James Aubert formed his watch company in the Vallée de Joux, known as the centre of the mechanical watch world. EPOS offers high-quality mechanical watches with interesting functions but still at an affordable price. Finished with loving care, according to the traditional Swiss watchmakers'™ heritage, they deserve to be called "Artistry in Watchmaking". EPOS is especially proud of its in-house innovations. For instance, special functions such as the power reserve indication, the big date or the regulator with the phases of the moon were developed in Jean Fillon's™ workshop, James Aubert SA.
